

FF-950-1.1

Host Profile Self-Test Compliance Statement

I, _____, of _____
(tester name - printed) (company name – printed)

certify the following:

1. The results in the provided test plan were obtained by using the original, unmodified host test cases (Section 7.6 of FF-525) from the original witnessed host profile test campaign against the host specified below. _____ (initial)
2. No feature(s) for the host under test that were documented in the registration certificate for the original version of the host were removed in the host specified below. _____ (initial)
3. I understand that if the self-tested host has new features that were not documented on the registration certificate for the original witnessed test, they will not be added to the certificate for the updated host specified below. _____ (initial)
4. The host specified below is an update to, or rebranding of, a host profile that was witnessed under a test campaign within the last three calendar years from the date of the execution of this document. _____ (initial)
5. The host specified below is the same profile number as the previously witnessed and registered host test campaign. _____ (initial)
6. No supported blocks from the “Standard Function Block” feature list for the previous registration of the host specified below were removed in the self-tested host specified below. _____ (initial)
7. If the H1 Physical layer of the Host Profile has been modified since it was last tested and witnessed by a Foundation employee, a new Physical layer conformance test has been executed and the results have been documented in form FF-652 and provided with the other documents for this campaign. _____ (initial)
8. If the H1 or HSE stack of the Host Profile has been modified since the host was last tested and witnessed by a Foundation employee, the stack has been re-tested for conformance and the results have been provided with the other documentation for this campaign. _____ (initial)
9. The results indicated in the test report were obtained by following the Foundation Fieldbus Host Profile Self-Test or Rebranding Process as defined in FF-525, and are the results of HTK _____ for the host profile specified below. _____ (initial)
